REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 6,666,127 to Peles. The improvement comprises an actuator with a fluid supply means connected for separately pressurizing the fluid muscle and the annulus, whereby the fluid muscle can be caused to contract to produce actuation movement of the second end by releasing pressure from the annulus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Peles is cited for the showing of an actuator similar to applicant's but lacking the ability to contract upon releasing pressure from the annulus.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of four patents.

Guagliano et al. (6,352,455), Krauter (5,191,879), Negishi (5,067,390) and Yarlott (3,645,173) are cited to show flexible actuators.

Contact Information

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thomas Lazo whose telephone number is (571) 272-4818. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:30 pm.

Application/Control Number: 10/736,754 Page 3

Art Unit: 3745

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Edward Look, can be reached on (571) 272-4820. The fax phone number for this Group is (703) 872-9306.

Any inquiry of a general nature or relating to status of this application or proceeding should be directed to the Patent Application Information Retrieval (PAIR) system. For more information about the PAIR system, see http://pair-direct.uspto.gov.
